Checkpoint 6 Sprint delivery 25-04-2024   ☺

Morar, Tudor T.Ş. a month ago

During the last sprint we have continued delivering the planned stories. We have managed to meet the expectations of this sprint in both the frontend as well as the backend. During the presentation, the client appeared to be satisfied with what we have demoed, not having any remarks requesting changes. Our opinion, as well as the client's at the end of the meeting, is that we are moving at an appropriate pace and that we will, by keeping the speed we currently move at, be able to finish the demanded features for this group project.

Checkpoint 5 Sprint delivery (Nicole) 11-04-2024 🔒   ☺

Katsarski, Kiril K.I. a month ago

The past sprint has been highly productrive for our team, we've gained speed in implementing features in both the frontend and the backend - the clients were overall satisfied with our progress, and we discussed how to potentially improve some of the insights, such as the most commonly referenced documents page. We think we are moving at a good pace and we expect to keep it up for the upcoming sprint(s).

Checkpoint 4 Group research plan (Nicole) 21-03-2024 🔒 ☺

Doykov, Yordan Y.A. 2 months ago

Today we discussed with Nicole our research plan. She indicated that it looks good and it combines research methods from all stages. However, she noted that the last 2 questions are not phrased correctly, as the research methods are the answer to the questions. We agreed that we would change them in the final research report.

Doykov, Yordan Y.A. 2 months ago

She also mentioned that during our research, we should note down who answers which questions, so she can directly link those answers to that person's learning outcomes.

Checkpoint 3 Delivery sprint 1 (Nicole/CY2) 14-03-2024 🔒 ☺

Valchanov, Nikolay N.N. 2 months ago

On Thursday we have had a meeting with the stakeholders as well as with Nicole. We have discussed multiple topics: Error logging, insights, posting issues, running the project as well as planning a next meeting. We have received feedback based on our figma prototyes on both error logging and llm insights. We have also established that the work done will be tracked through GitHub issues. Moreover, for our next meeting we have organized we will receive help in setting up and running the project.

Checkpoint 2 Update (Nicole) 07-03-2024 🔒 ☺

Doykov, Yordan Y.A. 2 months ago

Today Nicole passed by to see how we are doing with the group project. She was happy to see that we were organized well with the clients and were working on a visual prototype. She also gave us feedback on our project plan and advised us to improve the aspects of it such as: the context, pervious group's work, scope and research questions.

Checkpoint 1 Delivery HackIT (PO/Nicole) 22-02-2024 🔒

Morar, Tudor T.Ş. 3 months ago

In the first week of the semester, regarding the group project, we have received the documentation left by the previous group that has worked on the project, we have created user stories related to our future work and presented them to our stakeholders. They appeared to be happy with our input, with a suggestion to disregard the LLM-specific insights such as attention tracing and focus on more basic insights. As a follow-up we have been advised to create a project plan and expand on the already existing stories.
