Checkpoint 5 Final sprint retrospective 20-06-2024

Wrapped up things very well in the last sprint organization-wise. Clients were very satisfied.

Worked on the demo video and updating of the presentation. Made some imrpovements on the frontend.

Has done great work in wrapping up the project, ensuring the deployment works as expected

---

Checkpoint 4 Sprint 7 Rrtrospective 06-06-2024

Managed to deploy and seed the application with the required data for UAT, very satisfied with my work

Did a good job improving the frontend, adding documentation and preparing the app for UAT

Has done great work in his assigned issues.

Gave me good feeback about the logs and what can be improved. Good communication.

Checkpoint 3 Sprint 6 Retrospective 23-05-2024

Pretty happy with my work the past sprint, did UAT tasks and updated documentation.

engineered UAT tasks, helped improve the frontend and the backend

Yordan was doing good job with enchasements the frontend and also improved the documentation with some user acceptance tests

Yordan has done good work in the organizational aspect as well UATs and documentation

Checkpoint 2 Sprint 4 Retrospective 25-04-2024 ☺

Connected the logs functionality to the backend, client was happy.

Good job on the frontend connecting it to the backend

Yordan has done a great job in managing the team, treating his assigned tasks with outmost seriousness. Additionally he was always available.

Did great job with connecting the frontend with the backend and gave useful suggestions for improvements.

Checkpoint 1 Sprint 3 retrospective 11-04-2024 ☺

Setup the azure environment and did the logs page of the frontend, nice progress.

Implemented complex features such as pagination and advanced filtering in the frontend, good job

Yordan was doing good job on the frontend part for the logs adding pagination and preparing to connect it to the backend.

Has done great work in creating the logging part, of the frontend as well as extra tasks involving deployment and organization of the team
